

## Gallagher goes wireless

All the conferencing and exhibition facilities at Gallagher Estate are now covered by Telkom's wireless (WiFi) network, Telkom T-Zone, enabling clients to access the Internet directly from their own WiFi-enabled laptops or PCs. Users simply log on to the WiFi connection, complete a form and pay by credit card for the amount of time they will need to be connected. A wireless network card is available for daily hire for those without the necessary hardware.
