Senior Data Analyst

Location:	Pretoria
Type:	Permanent
Reference:	#NG58916
Company:	E-Merge IT Recruitment

An organisation with an excellent, sustainable and effective medical scheme driving transformation in the healthcare industry, aligned with the principles of universal healthcare coverage and offering healthcare benefit Options has a vacant position for a **senior data analyst** seeking to build a career with a team that offers the opportunity to be part of this exciting growth journey.

Responsibilities:

- Provide valuable insights for strategic decision making and accurate information for day-to-day operational management.
- Source information from different data warehouses, data marts, manual systems and on-line systems.
- Develop new reports, report formats and standards based on identified user requirements for the business, using multiple technologies.
- Analyse derived information to create value added understanding of insights.
- Develop regular performance reports related to needs of the business sales force.
- Propose approaches to the business on monitoring measures or (KPIs) associated with the business case and business models.
- Analyse trends within the business data to reduce risks, optimise performance of the business and inform People Function decisions.
- Conduct integrity checks on all extracted data to ensure correct data.
- Engage with other key stakeholders within the Group to ensure the business leverages off what is available and are aware of initiatives in the group that may impact on the business.
- Conduct impact analysis of any proposed changes that will impact on information reporting.
- Continuously enhance the business expertise by analysing its drivers, key indicators, relationships and trends.

Qualifications and experience:

- Bachelor's degree in information technology or a related qualification
- At least five years' experience in advanced data analytics in the healthcare industry
- At least two years' experience in the Medical Scheme industry will be an added advantage
- Python
- SAS
- SQL
- Power BI
- QlikView
- Data warehousing
- Data visualisation
