

Get ready for the new Datsun GO and GO+

Since launching in South Africa four years ago, Datsun has seen significant success in the local A segment. Yet, the company is committed to continued innovation with technologically advanced features to dominate this competitive segment.

Datsun takes great pleasure in bringing the exciting new GO and GO+, which have a range of state-of-the-art features, to South Africa.

Kabelo Rabotho, Nissan South Africa marketing director, says, “We are focused on giving our customers the best service while providing high-quality vehicles that serve the needs of everyone; from first-time buyers to entrepreneurs and also senior citizens, who love our reliable cars.”

In a short space of time, the Datsun GO has become a firm favourite in South Africa and the stylish new models are sure to be just as popular. More details about pricing and spec information will be released soon.
