

Kenya Airways airline alliance launches online planner

Following the launch of a user-friendly application developed by SkyTeam, the global airline alliance of which Kenya Airways is a member, passengers of the airline can now use the online application to plan their travels to various destinations around the world in advance.

The application allows passengers to create their own Round-The-World itinerary using the networks of all SkyTeam member airlines that include: Aeroflot, Aeromexico, Air Europa, Air France, Alitalia, China Airline, China Eastern, China Southern, Czech Airlines, Delta Air Lines, KLM, Korean Air, TAROM and Vietnam Airlines.

"With hundreds of destinations to choose from, SkyTeam can take our customers wherever they want to go whenever they want to go, whether they are traveling for business or pleasure," said Mauro Oretti, SkyTeam's vice president of sales and marketing.

He added, "Our new planner has been developed to maximize customers' potential travel opportunities, whilst minimizing the complexity of planning a Round-The-World itinerary."

Kenya Airways customers can access the application via the recently refreshed skyteam.com website, while a customized version for travel agents can be accessed via the newly created dedicated skyteam.biz website.
