

New digital SLR camera with interchangeable lens

Pentax has released the K10D lens-interchangeable digital SLR camera, which features a large, high-performance 23.5mm x 15.7mm CCD with 10.2 effective megapixels . Features includes the Pentax-developed shake reduction system; a newly developed A/D converter for converting large volumes of data more faithfully and swiftly; a new exclusive high-performance imaging engine; a new dust removal system to keep dust off the CCD surface; a Pentax-original exposure system for faithful reproduction of the photographer's creative intentions; and a dependable dust-resistant, weather-resistant body construction.
